

# Let's talk about Hipro Soya ... the facts!!

Anthony Bamber Managing Director of Raw Material Claims Ltd highlights the available allowance claims on Hipro Soya Meal since 2017 and how his commodity claims service can be valuable to those not currently involved in this process.

As a brief follow up to my article last year about the range of allowance claims on raw materials available throughout the animal feed industry, I have done some extensive research on the possible funds available on imported Hipro Soya through all UK suppliers.

The majority of animal feed companies and blenders use Hipro Soya in their finished animal feeds, ranging from 29 tonnes/month to much more depending on their business speciality and product formulations.

The table and graphic (right) highlight a range of allowance claims available since January 2017 with interesting results from an average % allowance taken across all industry suppliers from official vessel analysis results.

If you do your maths based on your own Hipro Soya usage then you may be very surprised with the results and availability of claims. Suppliers will not automatically refund the amounts for you as explained in my article last year as there are certain workings which need to be done to get your allowance claims back to your business.

I can personally help with all aspects of this for any size business even if buying small amounts so simply get in touch to have a chat. No upfront costs, confidentiality guaranteed and little effort on your behalf.
